# INTRODUCTION

This comprehensive book is the handy companion to our more detailed **UK Combine** and **UK Pocket Book** and similarly lists all private owner and preserved Network Rail registered Locomotives on UK railways. All preserved Steam Locomotives owned and operated by the big four (including constituent companies) are included, as are locomotives operating on Tramways, Light Rail & Metro Systems. Locomotives that have been exported are also shown.

Unless shown otherwise entries for Rolling Stock are laid out as follows:

\* Note most names are listed separately with \$ beside the number to denote it is named. Space has been left below each set of names to allow additions to be made.

## Locomotives

**Number / [Works Number] - Last Number Carried - Pool - Depot - Name \***

All locomotives, regardless of status (Operational, Stored, Preserved or Privately Owned), are listed in one section.

All codes are listed at the back of this book. Please see the contents page at the front for details. In addition the following should be noted:

In the Depot column: a value in brackets eg (TO) is a storage location

In the Pool column:

Wdn = Withdrawn, Pres = Preserved, Priv = Private Owner/Industrial use.

This has been prepared by the Inter City Railway Society using all available information up to 24<sup>th</sup> January 2018 and we welcome comments and queries which should be directed to:

**publications@intercityrailwaysociety.org**

Trevor Roots, Mill of Botary, Cairnie, Huntly, Aberdeenshire AB54 4UD

For a comprehensive list of all Locomotives operated by BR since 1948 showing all re-numberings with complete cross reference tables and disposal details then please consider our **Ultimate Sighting Files Vol.1 Mainline Diesel Locomotives (UKRS10)** and **Vol.2 Shunters, Mainline Electric & Prototype Locomotives (UKRS11)**. Last released in Sep 2013, both are due to be released as new editions mid 2018. These books are a handy way to record all your sightings showing the current status and irrespective of whether they no longer exist.

# EXPORTED LOCOMOTIVES

This section covers all locos permanently exported abroad that are believed to still exist. Where locos are hired abroad or operating under a European arm of the parent company eg DB Cargo, they will appear under the appropriate class.

Information is presented in the order:

**UK No (Pre TOPS\*) - Current No - Year Exported - Location / Company / Name**

7103*	7103	1942	Piedmont Railway Museum, Turin, Italy

# PRESERVED MAINLINE STEAM LOCOMOTIVES

The following list includes all preserved steam locomotives that were built for and / or were operated by the Big Four and former constituent companies and British Railways. New locomotives eg. 60163 built to replace missing classes or in the case of 9351 what might have been, are also included but only once construction has started on major components. The four former War Department (WD) locos are also included that never worked in the UK prior to being repatriated and given UK identities in preservation ie. 8274, 45170, 90733 & 90775 and these are denoted by (WD) in the area code. The former operating area for each loco is listed with the exception of recent new builds. Replica locos, are also included in a separate section, be they of locos still extant or those scrapped. The status of each loco is included, as locos may be dismantled as part of an overhaul / ongoing restoration or stored in a dismantled state, hopefully helping you find them easier !! As some locos often swap between pre and post BR numbers or other company identities, all are shown where applicable. Note that for special anniversaries / galas some locos temporarily masquerade as other classmates long scrapped, though in the case of 34042 this has been made 'permanent'.

**Status Key:** Sectioned locos are denoted by #

- A Active (current boiler certificate)
- S Static Exhibit / Stored
- O Under Overhaul / Restoration (parts may be at various locations)
- N New Build - Constructed from scratch or with components from scrapped locos:  
1014 (7927/48518), 4709 (2861/4115/5227)
- C New Build - Constructed by conversion of a former donor loco: 2999 (4942),  
9351 (5193), 84030 (78059)
- D Stored Dismantled

Information is presented in the order:

**Number - Alt Number - TOPS Number - Name - Wheels - Status - Location**
